Advance Programming 2015

FiraTàrrega concentrates its activities in four main sections that you can experience with more or less intensity according to your preferences. The **Official Selection** is aimed at generalist programmers and is a place where you can enjoy the best Catalan and international creations; the **Platform** section is the place reserved for prototypes and contemporary creation, designed for professionals who are looking to get out of their comfort zone; **Ondara Park**, for presenting works related to animation and entertainment, materials for professionals interested in the most festive street arts; and the **Open Program** is where we incorporate the most popular interventions, with a clear commercial vocation proposed by specialized Catalan agencies. That said, here are some of the names that we propose for 2015.

NOTE: The entire FiraTàrrega 2015 schedule will be available starting at the end of June at www.firatarrega.com
