About the project
SPHERA is a visually impactful outdoor duet for non-conventional spaces that explores the relationship between the visible, bright side of the Moon and humankind; the luminous moonlight that we see from planet Earth and illuminates our nights. SPHERA is a dance of liquid bodies that change and morph under the influence of the Earth's spherical satellite: the Moon. This production evolved from [and complements] the darker ORBIS, performed with black capes on black astroturf.

Current status and forecast
The piece premiered in September 2020 at Greenwich&Docklands International Festival (Dancing City) in London. It is currently available for touring.
